Claims 8-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/4/2008.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Lemelson.

Lemelson teaches extruded tubing of plastic or in some cases metal (see first paragraph of column 1) that is formed by extrusion and has a helical profile formed on the outer surface. Such a helical profile will inherently have complementary or alternating profiling of opposite sides of the tube wall (i.e. the peak formed on one side will align with a trough on the opposite side of the tube). Thus, each limitation of claim 5 is met by Lemelson.

Applicant's arguments with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection.

Claims 1-4, 6, and 7 are allowed.

Applicants should note the helical metal tube profile shown in Sakaya et al., which has a uniform wall thickness.
